

# Design Your Own **TECH**

## National Deaf Children's Society Design Your Own Tech competition

Do you feel  
frustrated by the  
technology you use  
and wish you could  
make it better?

Or maybe  
you have an idea  
that would make  
a perfect new  
invention?

Working either on  
your own, or as part  
of a school team,  
could you improve  
technology?

Winners will be selected by a panel of deaf young people and winning entrants will get the chance to present their idea in London on 22 November 2017 to those with the power to help make your designs a reality.

Winning schools can choose a prize of either an iPad or VR headset.

## Are you a deaf young person?
